

How to ship

When boxing or crating your parts, make sure that none of the sheet metal is touching or rubbing another piece in any way. It is best to wrap each piece in towels or foam paper or bubble wrap. It is best to put each part in a separate box or especially the tank and fenders.

Combs Custom Cycles IS NOT RESPONSIBLE for damage to your sheet metal caused by improper packaging.

Be sure to insure your package and ship UPS.

Click here to fill out this form, print and put a copy in each box before taping closed.

Important!! Please make sure all gas and/or oil has been completely removed from pieces. In addition, please remove all miscellaneous pieces, i.e. gas caps, cross-over tubes, paint savers, fittings, pet cocks. In other words, if you don't want it painted, please don't send it.
